

HL80M Dri-Prime® Pumps

The HL80M Dri-Prime 4" x 3" (100mm x 75mm) centrifugal pump is unique in the portable pumping industry. It's like having two pumps in one. *High pressure discharge* capabilities to 150 psi (10.3 BAR) make the HL80M perfect for closed system pumping, water main testing, and wellpoint jetting. The HL80M also can be used as a typical open trench *solids handling* trash pump with no changing of parts. Constructed of hardened alloys for long life in rugged applications, a combination of automatic self-priming, solids handling and high pressure capabilities, make the HL80M Dri-Prime perfect for mines, quarries and industrial use.

Features

- Close coupled automatic self-priming 4" x 3" (100mm x 75mm) centrifugal pump with vacuum priming compressor mounted to a diesel engine. Available in electric drive or as bare shaft pumpend.
- All cast iron construction with cast chromium steel impeller. Also available in stainless steel and hardened steel alloy.
- Extensive application flexibility — will handle slurries and liquids with solids up to 1" (25mm) in diameter.
- Continuously operated "Godwin" air ejector priming device requiring no form of periodic adjustment or control.
- Dry running, oil bath, mechanical seal with abrasion resistant solid silicon carbide interfaces.
- Solids handling ball type Non Return valve with renewable flexible rubber seat and quick release access feature.
- Compact unit mounted on skid base or two wheeled highway trailer, both incorporating integral overnight running fuel tank.
- Simple maintenance — normally limited to checking engine oil and seal cavity oil levels.
